Precocious Sires List
April 7, 2011***

This is not an all-inclusive list but comprises of sires whose offspring will likely race at major venues. There are several regional sires that weren't included due to space issues. The criterion for the index is based upon statistics. It encompasses sires whose lifetime average is 17% or higher juvenile winners. For second crop sires, I have included those whose offspring win at 15% or higher. Horses marked with an asterisk (*) have 20% + lifetime winners.
